

Semiautomatic LED UV Curing Systems

Models UH105 and UH105-12

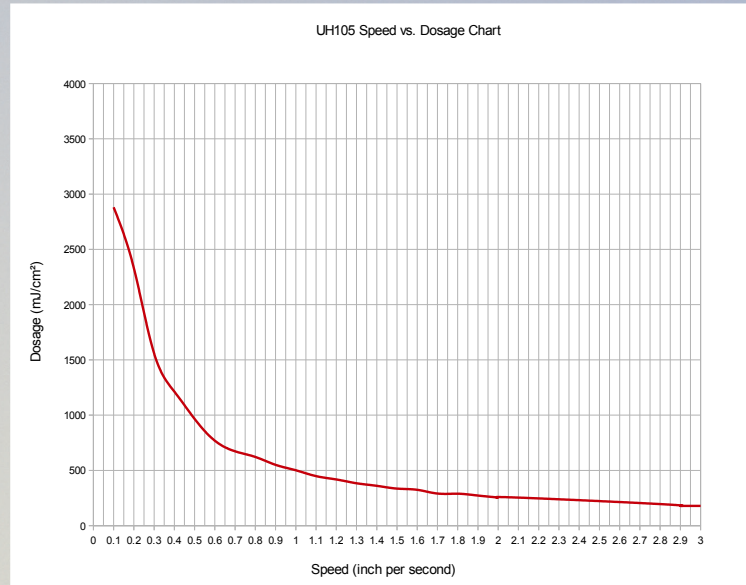

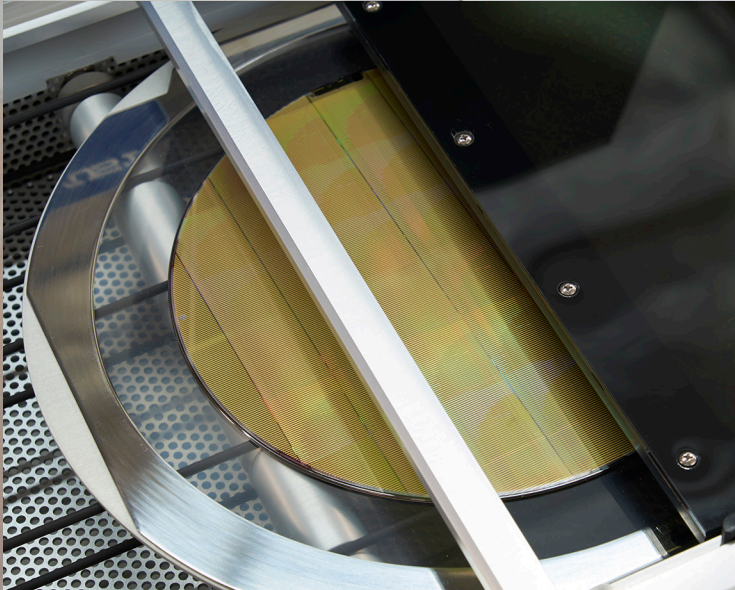

The Models UH105 and UH105-12 LED UV Curing Systems introduce cost-effective UV-LED light curing technology to your UV tape curing workflow in a compact desktop form-factor. They offer the same uniformity of UV exposure and highly efficient curing as our other UV curing systems while reducing operating costs and increasing green efficiency through lower power consumption and the elimination of mercury and ozone via a UV-A 365nm LED lamp array. Semiautomatic operation and on-demand curing ensure fast and consistent processing. A programmable controller accommodates multiple process recipes.

ULTRON SYSTEMS, INC.

Semiautomatic LED UV Curing Systems

Models UH105 and UH105-12

FEATURES

- UV-LED lamp array offers cost, performance, energy and environmental efficiencies
- Compact, benchtop profile accommodates up to 8-inch or 12-inch mounted wafer
- Fast and efficient UV curing is optimized through user programmable sequences.
- Easily programmable microprocessor-based controller
- Repeatable, reliable, semiautomatic operation
- Compact, maintenance-free, flexible, and process-friendly

SPECIFICATIONS

	UH105	UH105-12
Height:	10.53"	10.53"
Width:	26.55"	34.55"
Depth:	23.83"	27.83"
